TELTRONICS

Notes

# Script Release Note

**Script Name:** utils
**Version:** 4.0
**Script P/N** 130-9500-0053
**Date:** 08/31/2004

## Summary

The utils library is a proprietary Teltronics library used for automating certain tasks that are extremely common. Please refer to specific script release notes to determine whether this library is required.

## Dependencies

The utils script requires the following Teltronics library scripts:

N/A

The utils script requires the following software releases:

IRISnGEN v2.1 Patch 10 or higher
SEBea v3.0 or higher

## Installation

1. Copy the script file, utils.pye to the directory \IRISHOME\PythonScripts\Utils (Teltronics Python Library).

2. Create a new Script in IRISnGEN and make sure to carefully name the script “utils”. The name of the script is case-sensitive and must be in lowercase letters. Point the script's file path to \IRISHOME\PythonScripts\Utils (Teltronics Python Library)\utils.pye.

3. Set the Script Type to Library.
